INCIDENT & THREAT DETECTION REPORT

ORG: NORTHWIND ENERGY | CLASSIFICATION: SOC STRICT RESTRICTED

SCOPE	TIME WINDOW	GENERATED AT
corp-core • 24h	2026-09-14 06:58Z -> 2026-09-15 06:58Z	2026-09-15 06:58Z
OVERALL RISK: CRITICAL	ANALYZED FLOWS: 8	FLAGGED: 5 PEAK SCORE: 0.91

EXECUTIVE SUMMARY & EXPLAINABILITY ASSESSMENT

This window was flagged primarily due to elevated SYN/ACK ratio and port on sequential access ports 22, 23 and 445, combined with 14 SMB session setups from fin-db-02 to distinct hosts inside 90 seconds. Flow duration and TTL variance argue slightly against compromise but do not rule it out. SparseRSSM State Transition: High predictive confidence (0.94) for Lateral Movement across subnets.
